

## Overview: What This Dashboard Shows

This dashboard summarizes gameplay activity performed by FQA testers across supported platforms, builds, and game areas. It answers:

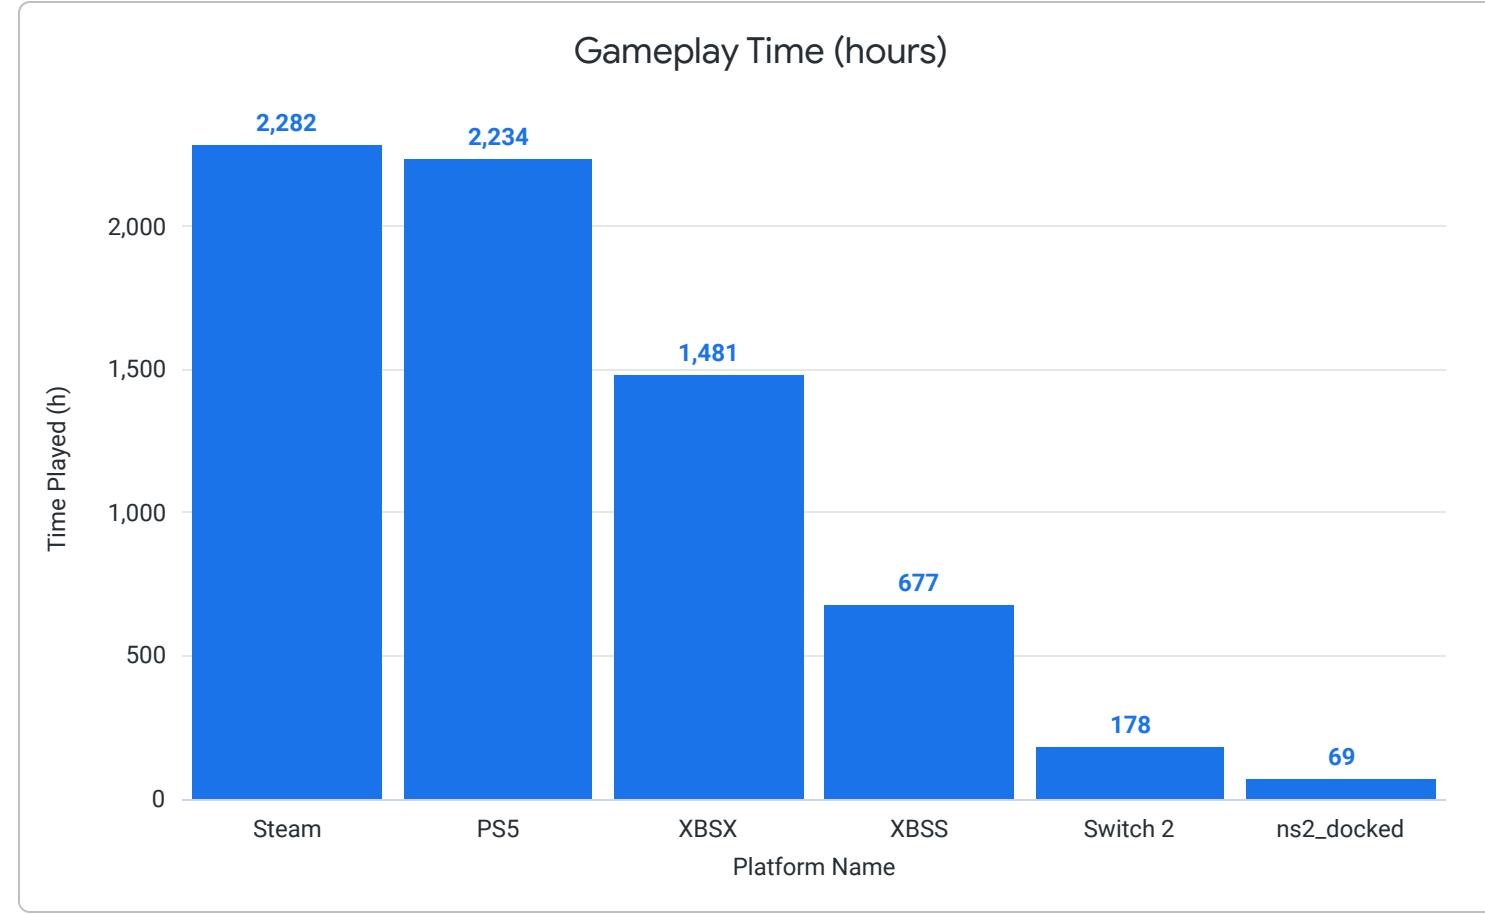

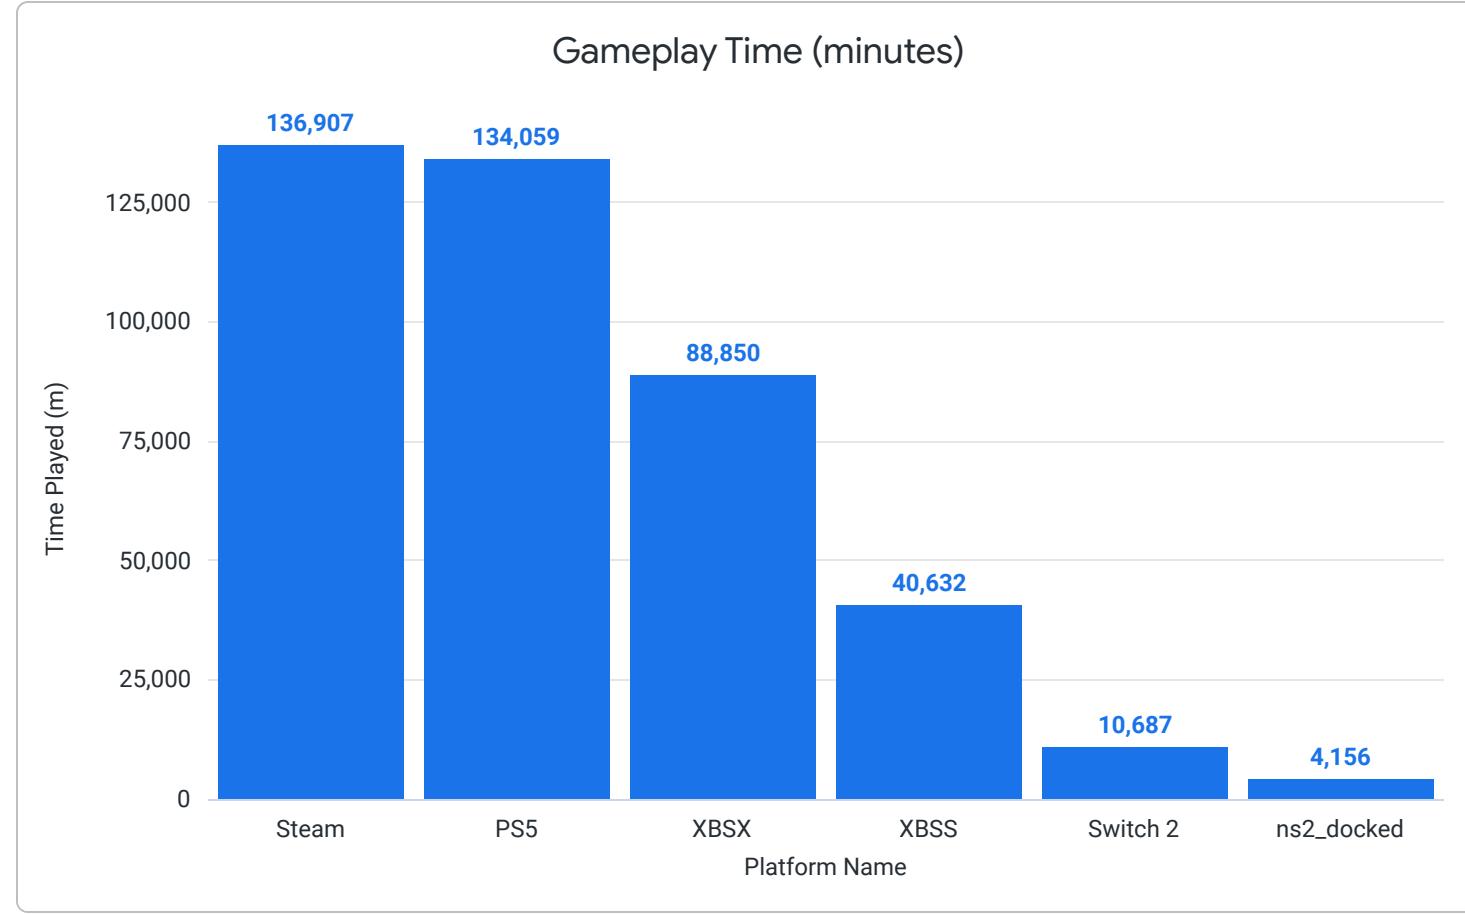

- How much gameplay time did testers generate?
- Which platforms and builds received the most coverage?
- How is time split by game mode (Singleplayer vs Co-op)?
- Which hub or mission areas received the most exploration or testing?
- Are any areas/platforms under-tested and requiring additional coverage?

This guides leads and coordinators to direct testing resources where coverage is low.
